Topic: Cloud Computing

Resource Person: Mr. Shailesh Hari Dinde, Senior Developer Windmill Smart Solution Pvt.Ltd, Pune.

Cloud Computing is a practice of using a network of remote servers hosted on the internet rather than a local server or a personal computer to store, manage, and process data.

With rapid changes in technology, Cloud computing has become the driving force of business in recent years. It has impacted on nearly every aspect of the Information Technology landscape including data and analytics, information security and project management. With this, it is needless to say that Cloud computing as a career has immense scope in India and abroad. Candidates prospecting a career in cloud computing can pursue various degree and certification programmes offered at undergraduate (UG) and postgraduate (PG) levels.
